Theologian, Spiritual Nurture & Digital Evangelist

Digital Evangelism Projects Portfolio

Impact Report and Statistical Analysis (2018 – 2025)

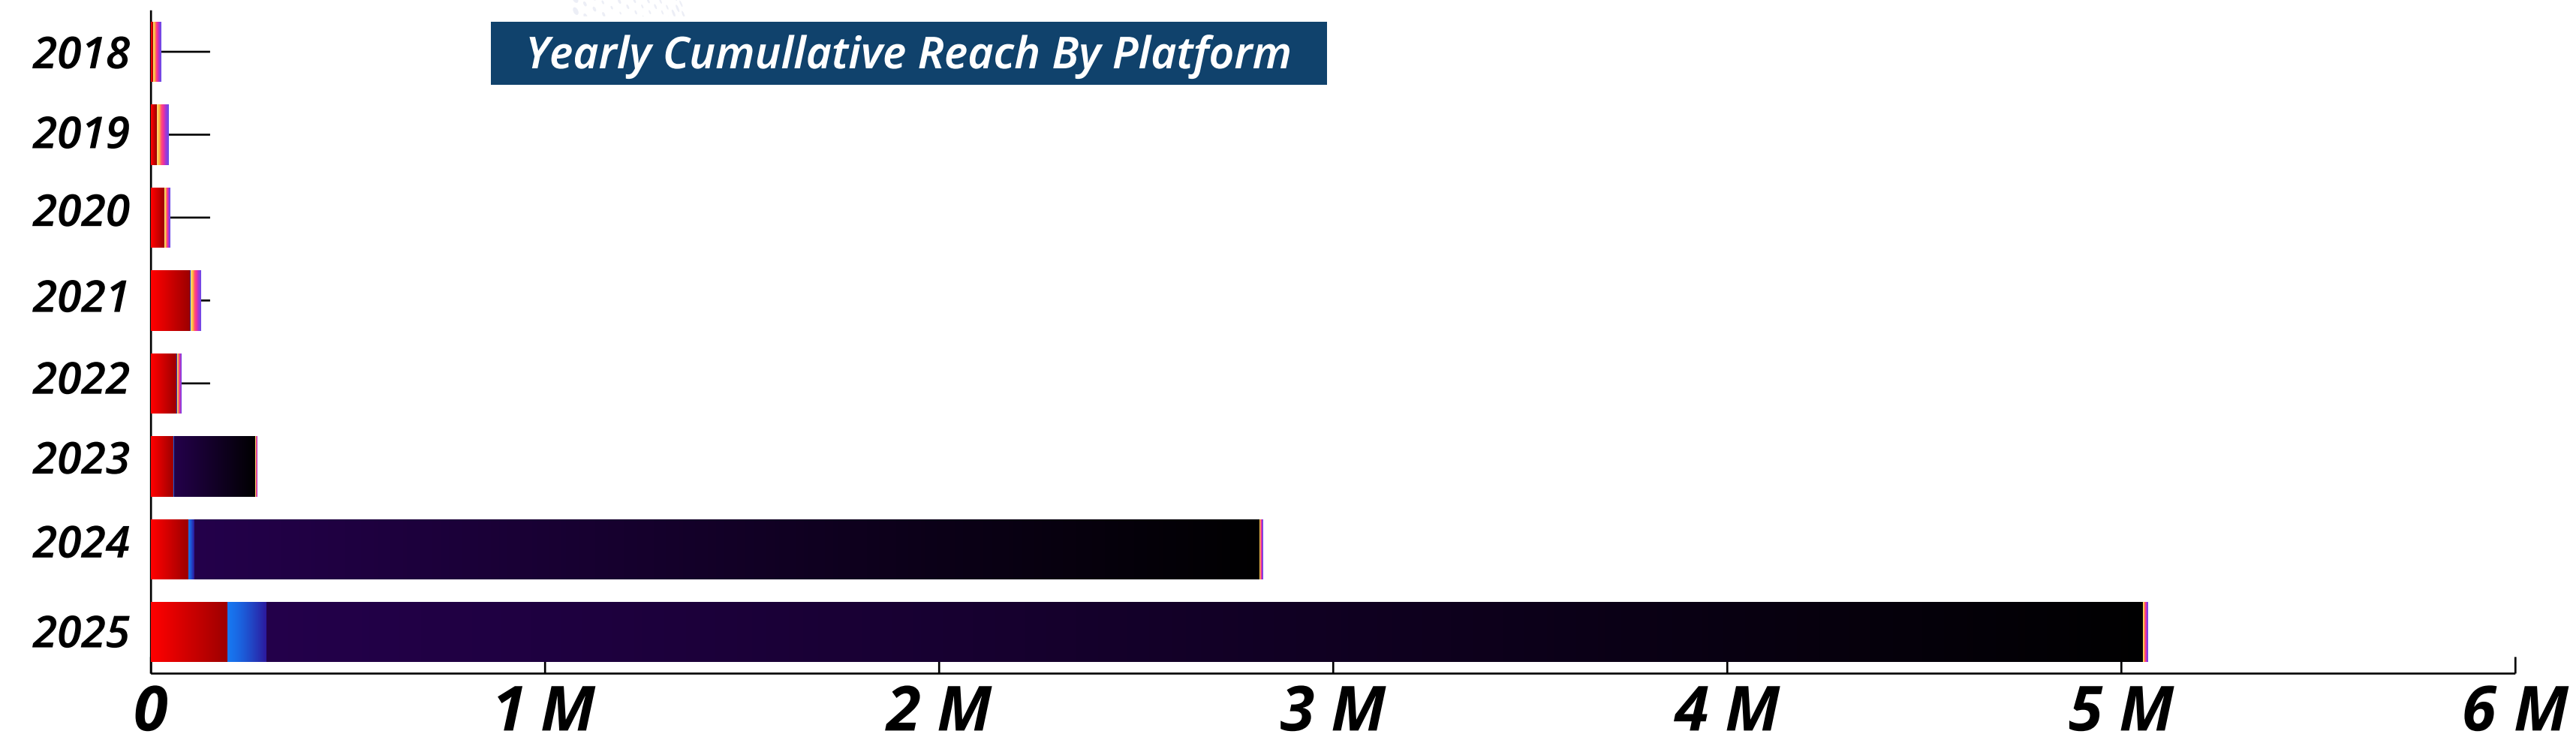

By using technology, we had a vision of inspiring youth to reach their goals while remembering their Creator. In this way, we were proclaiming the Gospel indirectly by calling their attention through something the youth could enjoy.

Touch Their Dreams

YOUTH GROUP

We are committed to supporting children and young people with special needs — not only by providing food and clothing, but more importantly, by helping them achieve their dreams. We believe that disability is not inability, and poverty is not a disease.

10

Baptised

Successful evangelism within Adventist institutions is achieved through enrolling a large number of academic students, so that they may become disciples of Jesus—and when they believe, they are baptized. When the number of academic students is low in our church institutions, the number of Jesus’ disciples also decreases.

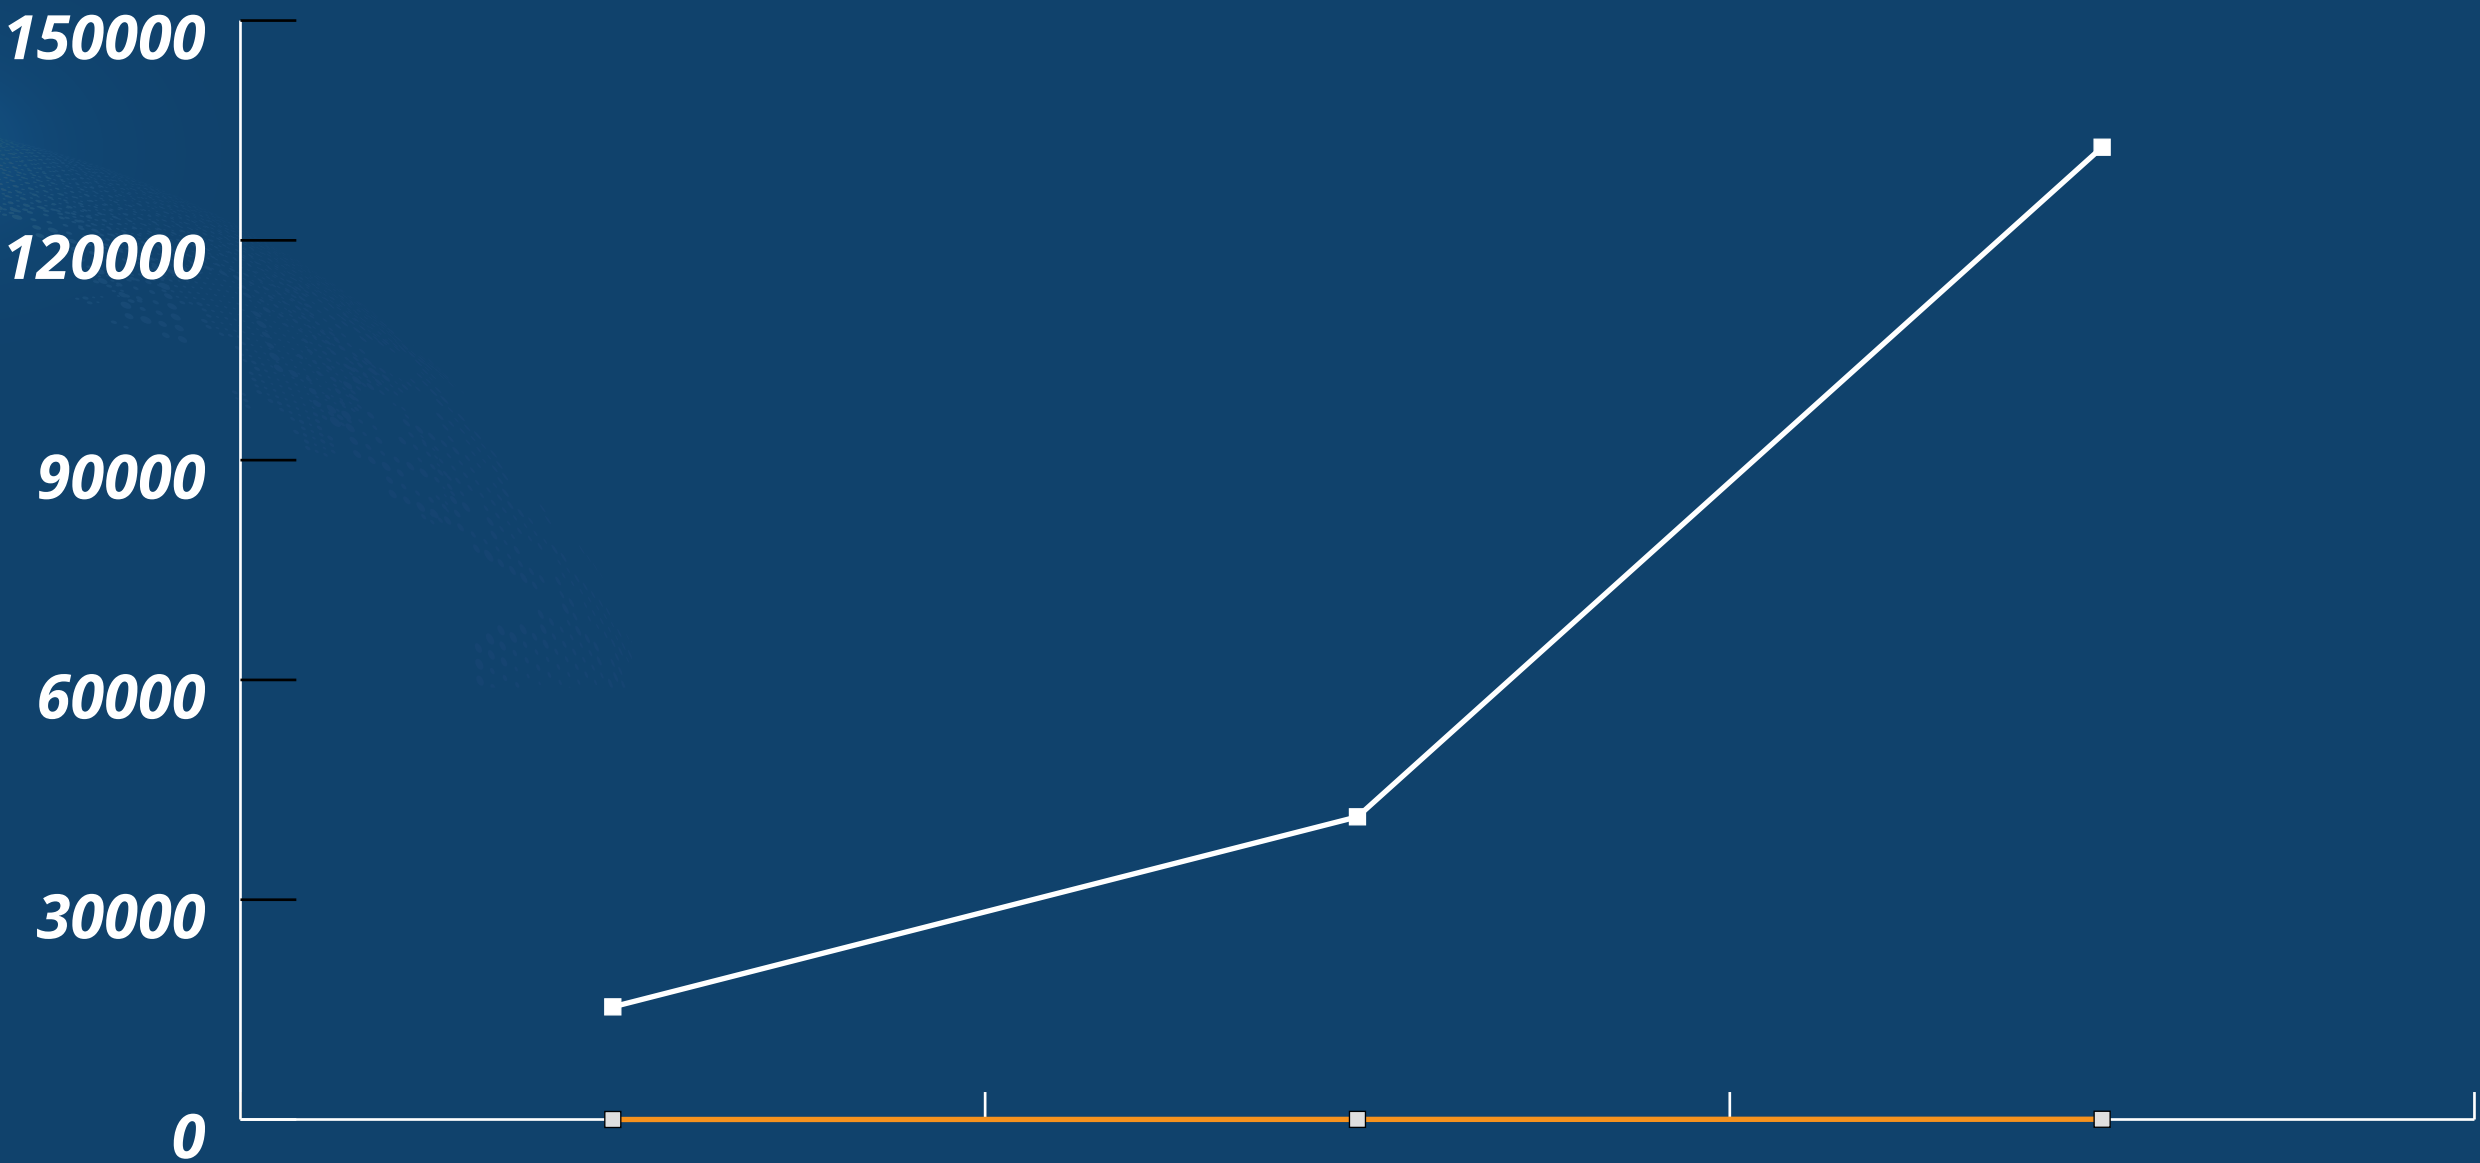

Therefore, promoting academic programs through digital means not only attracts more students academically, but also brings in hundreds of dedicated disciples of Jesus—far more effectively than traditional methods alone.

That is why it was Essential to invest in this initiative.

Online SDA Church

IDENTITY SEMINARS

Since human beings spend more time on social media than even attending Adventist leadership seminars, it has proven highly effective to conduct such church leadership trainings online.

Moreover, through social media and technology in general, when a single seminar is shared online, people naturally spread it widely. In doing so, they become part of the teaching process themselves—even if they never add a single word.

This enables millions of people to be reached quickly, without the barriers of time or distance.
